Nearly 15,000 Deaths, More than 700,000 Injuries Reported to VAERS Since December 2020 Rollout of COVID Vaccines in U.S.

VAERS data released Sept. 17 by the CDC showed a total of 701,561 reports of adverse events from all age groups following COVID vaccines, including 14,925 deaths and 91,523 serious injuries between Dec. 14, 2020 and Sept. 10, 2021.

Open letter from Canadian doctor Charles D. Hoffe dated April 5, 2021 of the Lytton Medical Clinic to Dr. Bonnie Henry, British Columbia Provincial Health Officer:

"The first dose of the Moderna vaccine has now been administered to some of my patients in the community of Lytton, BC. This began with the First Nations members of our community in mid-January, 2021. 900 doses have now been administered.

I have been quite alarmed at the high rate of serious side-effects from this novel treatment.

From this relatively small number of people vaccinated so far, we have had:
Numerous allergic reactions, with two cases of anaphylaxis.

One (presumed) vaccine induced sudden death, (in a 72 year old patient with COPD. This patient complained of being more short of breath continually after receiving the vaccine, and died very suddenly and unexpectedly on day 24, after the vaccine. He had no history of cardiovascular disease).

Three people with ongoing and disabling neurological deficits, with associated chronic pain, persisting for more than 10 weeks after their first vaccine. These neurological deficits include: continual and disabling dizziness, generalised or localized neuromuscular weakness, with or without sensory loss. The chronic

pain in these patients is either generalised or regional, with or without headaches.

So in short, in our small community of Lytton, BC, we have one person dead, and three people who look as though they will be permanently disabled, following their first dose of the Moderna vaccine. The age of those affected ranges from 38 to 82 years of age."

More from Dr. Charles D. Hoffe's letter (scroll below):

5 April, 2021

OPEN LETTER

Dr. Bonnie Henry,
British Columbia Provincial Health Officer
Ministry of Health,
1515 Blanchard Street,
Victoria, BC, V8W 3C9

Dear Dr. Henry,

The first dose of the Moderna vaccine has now been administered to some of my patients in the community of Lytton, BC. This began with the First Nations members of our community in mid-January, 2021. 900 doses have now been administered.

I have been quite alarmed at the high rate of serious side-effects from this novel treatment. From this relatively small number of people vaccinated so far, we have had:

1. Numerous allergic reactions, with two cases of anaphylaxis.
2. One (presumed) vaccine induced sudden death, (in a 72 year old patient with COPD. This patient complained of being more short of breath continually after receiving the vaccine, and died very suddenly and unexpectedly on day 24, after the vaccine. He had no history of cardiovascular disease).
3. Three people with ongoing and disabling neurological deficits, with associated chronic pain, persisting for more than 10 weeks after their first vaccine. These neurological deficits include; continual and disabling dizziness, generalised or localised neuromuscular weakness, with or without sensory loss. The chronic pain in these patients is either generalised or regional, with or without headaches.

So in short, in our small community of Lytton, BC, we have one person dead, and three people who look as though they will be permanently disabled, following their first dose of the Moderna vaccine. The age of those affected ranges from 38 to 82 years of age.

So I have a couple of questions and comments;

1. Are these considered normal and acceptable long term side-effects for gene modification therapy? Judging by medical reports from around the world, our Lytton experience is not unusual.
2. Do you have any idea what disease processes may have been initiated, to be producing these ongoing neurological symptoms?

3. Do you have any suggestions as to how I should treat the vaccine induced neuromuscular weakness, the dizziness, the sensory loss, and the chronic pain syndromes in these people, or should they all be simply referred to a neurologist? I anticipate that many more will follow, as the vaccine is rolled out. This was only phase one, and the first dose.
4. In stark contrast to the deleterious effects of this vaccine in our community, we have not had to give any medical care what-so-ever, to anyone with Covid-19. So in our limited experience, this vaccine is quite clearly more dangerous than Covid-19.
5. I realise that every medical therapy has a risk-benefit ratio, and that serious disease calls for serious medicine. But we now know that **the recovery rate of Covid-19, is similar to the seasonal flu, in every age category.** Furthermore, it is well known that the side effects following the second shot, are significantly worse than the first. So the worst is still to come.
6. It must be emphasised, that these people were not sick people, being treated for some devastating disease. These were previously healthy people, who were offered an experimental therapy, with unknown long-term side-effects, to protect them against an illness that has the same mortality rate as the flu. Sadly, their lives have now been ruined.
7. It is normally considered a fundamental principal of medical ethics, to discontinue a clinical trial if significant harm is demonstrated from the treatment under investigation.
8. So my last question is this; **Is it medically ethical to continue this vaccine rollout, in view of the severity of these life altering side-effects, after just the first shot?** In Lytton, BC, we have an incidence of 1 in 225 of severe life altering side-effects, from this experimental gene modification therapy.

I have also noticed that these vaccine induced side effects are going almost entirely unreported, by those responsible for the vaccine rollout. I am aware that this is often a problem, with vaccines in general, and that delayed side-effects after vaccines, are sometimes labelled as being "coincidences", as causality is often hard to prove. However, in view of the fact that this is an experimental treatment, with no long-term safety data, I think that perhaps this issue should be addressed too.

Furthermore I have noticed, that the provincial vaccine injury reporting form, which was clearly designed for conventional vaccines, does not even have any place to report vaccine injuries of the nature and severity that we are seeing from this new mRNA therapy.

It is now clearly apparent with medical evidence from around the world, that the side-effect profiles of the various gene modification therapies against Covid-19, have been vastly understated by their manufacturers, who were eager to prove their safety.

Thank you for your attention to this critically urgent public health matter.

Yours sincerely,

Dr Charles Hoffe

Teen Diagnosed With Guillain-Barré Weeks After First COVID Vaccine [April 6, 2021]:

https://childrenshealthdefense.org/defender/teen-guillain-barre-covid-vaccine/?utm_source=salsa&eType=EmailBlastContent&eId=29da8e5a-0d9e-4bd2-b9ae-a65b2e2e7b15 (<http://archive.today/EH6YJ>)

“THE LEVELS OF SICKNESS AFTER VACCINATION IS UNPRECEDENTED”

ACCORDING TO A LETTER FROM A LONDON HOSPITAL CONSULTANT
PUBLISHED IN BRITISH MEDICAL JOURNAL LAST WEEK [March 29, 2021].

The BMJ is one of the world's oldest general medical journals and regarded as a trustworthy source. Last week the BMJ published a letter from Katya Polyakova a Consultant in London.

The letter is available on the link below.

The following is an extract from the letter:

“...what I am currently struggling with is the failure to report the reality of the morbidity caused by our current vaccination program within the health service and staff population.

The levels of sickness after vaccination is unprecedented and staff are getting very sick and some with neurological symptoms which is having a huge impact on the health service function.

Even the young and healthy are off for days, some for weeks, and some requiring medical treatment.

Whole teams are being taken out as they went to get vaccinated together.

Mandatory vaccination in this instance is stupid, unethical and irresponsible when it comes to protecting our staff and public health.

We are in the voluntary phase of vaccination, and encouraging staff to take an unlicensed product that is impacting on their immediate health, and I have direct experience of staff contracting Covid AFTER vaccination and probably transmitting it.

In fact, it is clearly stated that these vaccine products do not offer immunity or stop transmission.

In which case why are we doing it? There is no longitudinal safety data (a couple of months of trial data at best) available and these products are only under emergency licensing.

What is to say that there are no longitudinal adverse effects that we may face that may put the entire health sector at risk?...

Coercion and mandating medical treatments on our staff, of members of the public especially when treatments are still in the experimental phase, are firmly in the realms of a totalitarian Nazi dystopia and fall far outside of our ethical values as the guardians of health.”

VAERS Reports as of 2/18/2021 (Statistics for COVID-19 vaccine adverse effects)

> 1,095 Deaths

<https://medalerts.org/vaersdb/findfield.php?TABLE=ON&GROUP1=AGE&EVENTS=ON&VAX=COVID19&DIED=YES> (<http://archive.today/oRPwE>)

> 19,907 Adverse Events

<https://medalerts.org/vaersdb/findfield.php?TABLE=ON&GROUP1=CAT&GROUP2=AGE&EVENTS=ON&VAX=COVID19> (<http://archive.today/8jI9b>)

NOTE: HHS - Guide to Interpreting VAERS Data

<https://vaers.hhs.gov/data/dataguide.html> (<http://archive.today/lgbTi>)

"Underreporting" is one of the main limitations of passive surveillance systems, including VAERS. The term, underreporting refers to the fact that VAERS receives reports for only a small fraction of actual adverse events."

Here are just SOME vaccine ingredients.
These are being INJECTED into your kids;

- Formaldehyde/Formalin - Highly toxic systematic poison and carcinogen.
- Betapropiolactone - Toxic chemical and carcinogen. May cause death/permanent injury after very short exposure to small quantities. Corrosive chemical.
- Hexadecyltrimethylammonium bromide - May cause damage to the liver, cardiovascular system, and central nervous system. May cause reproductive effects and birth defects.
- Aluminum hydroxide, aluminum phosphate, and aluminum salts - Neurotoxin. Carries risk for long term brain inflammation/swelling, neurological disorders, autoimmune disease, Alzheimer's, dementia, and autism. It penetrates the brain where it persists indefinitely.
- Thimerosal (mercury) - Neurotoxin. Induces cellular damage, reduces oxidation-reduction activity, cellular degeneration, and cell death. Linked to neurological disorders, Alzheimer's, dementia, and autism.
- Polysorbate 80 & 20 - Trespasses the Blood-Brain Barrier and carries with it aluminum, thimerosal, and viruses; allowing it to enter the brain.
- Glutaraldehyde - Toxic chemical used as a disinfectant for heat sensitive medical equipment.
- Fetal Bovine Serum - Harvested from bovine (cow) fetuses taken from pregnant cows before slaughter.
- Human Diploid Fibroblast Cells - aborted fetal cells. Foreign DNA has the ability to interact with our own.
- African Green Monkey Kidney Cells - Can carry the SV-40 cancer-causing virus that has already tainted about 30 million Americans.
- Acetone - Can cause kidney, liver, and nerve damage.
- E.Coli - Yes, you read that right.

- DNA from porcine (pig) Circovirus type-1
- Human embryonic lung cell cultures (from aborted fetuses)

* You can view all of these ingredients on the CDCs website. I encourage everyone to do their own research. Look up the MSDS on these chemicals. Read the thousands of peer reviewed studies that have evaluated the biological consequences these chemicals can have on the body, especially when being injected.

* Fact check vaccine ingredients here:

Straight from the FDA fact sheet:

"Adverse Reactions

Adverse Reactions in Clinical Trials

Adverse reactions following the Pfizer-BioNTech COVID-19 Vaccine that have been reported in clinical trials include injection site pain, fatigue, headache, muscle pain, chills, joint pain, fever, injection site swelling, injection site redness, nausea, malaise, and lymphadenopathy (see Full EUA Prescribing Information).

Adverse Reactions in Post Authorization Experience

Severe allergic reactions, including anaphylaxis, and other hypersensitivity reactions (e.g., rash, pruritus, urticaria, angioedema), diarrhea, vomiting, and pain in extremity (arm) have been reported following administration of the Pfizer-BioNTech COVID-19 Vaccine outside of clinical trials.

Additional adverse reactions, some of which may be serious, may become apparent with more widespread use of the Pfizer-BioNTech COVID-19 Vaccine."

(<https://www.fda.gov/media/144413/download>) (<http://archive.today/CcZ0B>)

The Coronavac (by Sinovac) COVID-19 vaccine composition:

Active ingredient: Inactivated SARS-CoV-2 Virus (CZ02 strain)

Adjuvant: Aluminum hydroxide [proven neurotoxin, see studies such as: "Aluminum hydroxide injections lead to motor deficits and motor neuron degeneration – 20 August 2009 –": <https://www.sciencedirect.com/science/article/pii/S0162013409001809> (<http://archive.today/YpCjw>) & "Aluminum adjuvant linked to Gulf War illness induces motor neuron death in mice": <https://pubmed.ncbi.nlm.nih.gov/17114826/> (<http://archive.today/Ryb6E>)]

(<http://archive.today/Eeyve>) BMJ – British Medical Journal

Usage of sterilizing shots ("contraceptive vaccines") as a means for birth control, the Bill & Melinda Gates Foundation funded WHO has been developing them, and somehow HCG antigen (HCG hormone that supports pregnancy) slipped into mass vaccinating of Kenyan women of tetanus shots by WHO in Kenya which resulted in sterilizing these Kenyan women (see study here:

https://www.researchgate.net/publication/320641479_HCG_Found_in_WHO_Tetanus_Vaccine_in_Kenya_Raises_Concern_in_the_Developing_World

(<http://archive.today/7q4OE>) & <https://m.scrip.org/papers/81838>)

(<http://archive.today/UKTpB>)

"The Danish government and Novo Nordisk Foundation commissioned this study by a team of the world's leading experts on African vaccination. The two most prominent names, Drs. Soren Mogensen and Peter Aaby, are both vocal vaccine supporters. They were shocked when they examined years of data from a so called "natural experiment" in Guinea Bissau where 50% of children die before age five. In that west African nation, half the children were vaccinated with the DTP vaccine at three months and the other half at six months. Dr. Mogenson and his team found that girls vaccinated with the DTP vaccine died at 10 times the rate of unvaccinated kids. While the vaccinated children were protected from Diphtheria, Tetanus and Pertussis, they were far more susceptible to other deadly diseases than unvaccinated peers. The vaccine apparently compromised their immune systems."

(<https://childrenshealthdefense.org/news/the-bill-gates-effect-whos-dtp-vaccine-kills-more-children-in-africa-than-the-diseases-it-targets/>) (<http://archive.today/EhJTz>)

"Sindh registered two new cases of polio on Thursday, when three-year-old Sadaf and four-year-old Bilal, children of Nadir Ali Basti, were diagnosed with the virus at Guddu town on Thursday. Basti alleged that his children caught the disease as a reaction to the polio vaccine administered to them and demanded the government probe the matter and take action against the culprits.":

<https://tribune.com.pk/story/340840/crippled-for-life-two-children-get-polio-as-father-blames-vaccine> (<http://archive.today/wXlIC>)

More polio cases were caused by WHO's vaccine than by the wild polio virus itself in Africa and Pakistan:

A team of neuroscientists from the Department of Ophthalmology and Medicine at the University of British Columbia did a study on the effects of Aluminum Hydroxide which demonstrated its great neurotoxicity. Their studies were published in the following peer reviewed medical journals: **Journal of Neuromolecular Medicine**, and **Journal of Inorganic Biochemistry** (Aluminum hydroxide injections lead to motor deficits and motor neuron degeneration – 20 August 2009 –

(<https://www.sciencedirect.com/science/article/pii/S0162013409001809>)

(<http://archive.today/YpCjw>)

The alarming thing is that, among other questionable substances, aluminum and specifically aluminum hydroxide is used in some of the mandated infant/child vaccinations in Canada.

One of the neuroscientists who did this study was asked why Health Canada hasn't taken notice of these studies as aluminum hydroxide is used in child vaccines. He said: "Health Canada can read the literature if they are interested, which they are not."

Here is a compilation of studies about the link between Mercury and ASD. The study is from September 2016 and the conclusion reads in part:

"From this inventory of the available research, it is clear that the vast majority of the research, conducted by multiple research groups, from many different countries, using many different methodologies, supports a link between mercury exposure and a diagnosis of ASD. In this evaluation, it was found that 74% of studies support a link between mercury exposure and ASD, which corroborates a previous evaluation of the same issue conducted in 2010. In that study, Desoto and Hitlan also found that 74% of studies support a link between mercury exposure and ASD [159]. This agreement in science six years later is compelling and supports the validity of the finding:"

Vaccinated are at higher risk of flu AND all illness:

A 2011 study found that seasonal flu shots increase the risk of flu by 73% and doubled the risk of non-flu respiratory infections.

<https://doi.org/10.1097/inf.0b013e318201811c> (<https://archive.is/aMxZr>)

A 2011 study confirmed that annual influenza vaccination indeed hampers the development of a robust cell-mediated immunity. Annual vaccination for influenza, “may render young children who have not previously been infected with an influenza virus more susceptible to infection with a pandemic influenza virus of a novel subtype.”

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3209321/>
(<http://archive.today/iwnWh>)

A 2018 study found there was an increase of acute respiratory infections caused by non-influenza respiratory pathogens following influenza vaccination compared to unvaccinated children.

<https://www.sciencedirect.com/science/article/pii/S0264410X18303153?via%3Dihub>
(<http://archive.today/zEaZm>)

Children who get the flu vaccine have 3x the risk of being hospitalized for flu.

<https://www.sciencedaily.com/releases/2009/05/090519172045.htm>
(<http://archive.today/SRh3P>)

A 2014 study found that the more the people had been vaccinated in prior years, the less effective the vaccine is at preventing the most recent season’s dominant H3N2 virus.

As they put it, “vaccine-induced protection was greatest for individuals not vaccinated during the prior 5 years.”

<https://www.ncbi.nlm.nih.gov/pubmed/25270645> (<https://archive.is/RdaUq>)

Not only are there serious questions about the efficacy of the flu vaccine, there is evidence to suggest that getting the vaccine every year may cause damage to the immune system.

In a 2016 study, researchers found that people who were vaccinated against the flu three years in a row were actually at higher risk of being infected with the flu.

<https://academic.oup.com/cid/article/63/1/21/1745238> (<http://archive.today/t6nor>)

Increased Risk of Noninfluenza Respiratory Virus Infections Associated With Receipt of Inactivated Influenza Vaccine

<https://academic.oup.com/cid/article/54/12/1778/455098?searchresult=1>
(<https://archive.is/C9PXe>)

A randomized controlled trial in 2012 found that influenza-vaccinated children had no significantly lessened risk from influenza and also a higher risk of infection from non-influenza viruses.

Flu vaccine makes people >6x more infectious than non-vaccinated when they contract influenza A:

<http://www.pnas.org/content/early/2018/01/17/1716561115> (<https://archive.is/NyGA4>)

2014 study - Influenza-like illness was more common in children vaccinated against influenza

<https://www.ncbi.nlm.nih.gov/pubmed/?term=24483149> (<https://archive.is/VBfCg>)

<https://www.ncbi.nlm.nih.gov/pubmed/?term=29348203> (<https://archive.is/RROrt>)

A study that compared children who received the flu vaccine to those who did not found the same rate of influenza in both groups following vaccination. It also found that the group of children who received the flu vaccine had a 4.4 times higher rate of non-influenza respiratory tract infections.

<https://academic.oup.com/cid/article/54/12/1778/455098> (<https://archive.is/QdHh4>)

Annual influenza vaccination hampers the development of virus-specific CD8(+) T cell responses

<https://pubmed.ncbi.nlm.nih.gov/21880755/> (<https://archive.is/lOgHe>)

Vaccination may make flu worse if exposed to a second strain

<https://m.medicalxpress.com/news/2013-08-vaccination-flu-worse-exposed-strain.html>
(<https://archive.is/lcOyw>)

A review in the medical journal The Lancet found a lack of health benefits from influenza vaccine in children under two along with significantly increased rates of vaccine-related adverse events.

<https://www.sciencedirect.com/science/article/abs/pii/S0140673605179847>
(<https://archive.is/E1nLH>)

A study published in Pediatrics International of Japanese children ages 6 months to 2 years who were vaccinated against the flu found that the influenza vaccine did not reduce the rate of influenza A infections in children under two.get more sick in the future.

<https://pubmed.ncbi.nlm.nih.gov/15056235/> (<https://archive.is/20A1E>)

Those who have taken vaccines in the past are more at risk with Covid 19. Why is this? Does taking this Vaccine make you more likely to get sick? I will explain this in an easy to understand way. With more details in later sections. Also, we need to ask, is this an emergency for real? Are more people dying?

Let us see what BMJ a medical journal says

Preventing a covid-19 pandemic

BMJ 2020 ; 368 doi: <https://doi.org/10.1136/bmj.m810> (Published 28 February 2020)

Cite this as: *BMJ* 2020;368:m810

Read our latest coverage of the Coronavirus outbreak

figures yield an odds ratio of 4.91 (CI 1.04 to 0.14).

Such an observation may seem counterintuitive, but it is possible that influenza vaccines alter our immune systems non-specifically to increase susceptibility to other infections; this has been observed with DTP and other vaccines. (Benn et al, Trends in Immunology, May 2013) There are other immune mechanisms that might also explain the observation.

Please keep in mind. Corona is not new. Many of the flu / influenza are a type of known coronavirus.

https://en.wikipedia.org/wiki/Coronavirus#Common_cold (<https://archive.is/kJQdr>)

The human coronaviruses HCoV-OC43, HCoV-HKU1, HCoV-229E, and HCoV-NL63 continually circulate in the human population and produce the generally mild symptoms of the common cold in adults and children worldwide.^[94] These coronaviruses cause about 15% of common colds,^[95] while 40 to 50% of colds are caused by rhinoviruses.^[96] The four mild coronaviruses have a seasonal incidence occurring in the winter months in temperate climates.^{[97][98]} There is no preponderance in any season in tropical climates.^[99]

Corona has many similarities to Flu and many differences. For example, corona can be like a flu, or like SARS, MARS or Corona 19.

	MERS-CoV	SARS-CoV	SARS-CoV-2
Disease	MERS	SARS	COVID-19
Outbreaks	2012, 2015, 2018	2002–2004	2019–2020 pandemic
Epidemiology			
Date of first identified case	June 2012	November 2002	December 2019 ^[100]
Location of first identified case	Jeddah, Saudi Arabia	Shunde, China	Wuhan, China
Age average	56	44 ^{[101][a]}	56 ^[102]
Sex ratio (M:F)	3.3:1	0.8:1 ^[103]	1.6:1 ^[102]
Confirmed cases	2494	8096 ^[104]	102,926,497 ^{[105][b]}
Deaths	858	774 ^[104]	2,227,003 ^{[105][b]}
Case fatality rate	37%	9.2%	2.2% ^[105]

Please keep in mind the 2.2% that die WITH Covid not by Covid. The Real Percentage is 6% of that die by Covid.

Dissolving Illusions: Disease, Vaccines, and the Forgotten History by Dr. Suzanne Humphries, MD

https://www.amazon.ca/Dissolving-Illusions-Disease-Vaccines-Forgotten/dp/1480216895/ref=sr_1_1?crid=36KJ7UDOVDP4&dchild=1&keywords=dissolving+illusions&qid=1610964312&s=books&sprefix=Disso+Illusions%2Cstripbooks%2C182&sr=1-1 (<https://archive.is/rpfGu>)

Dr. Suzanne Humphries proves in this seminal exposition that vaccines did not eradicate disease and save millions of lives.

Book called Critical **Vaccine Studies** (see below for pictures of the book). This contains 400 peer reviewed scientific studies on vaccines (on their evidenced harms).

MILLER'S REVIEW *of* CRITICAL VACCINE STUDIES

400
Important
Scientific
Papers
Summarized
for Parents
and
Researchers

Neil Z. Miller

Foreword by
Gary Goldman, PhD

*"I recommend this book to any parent
who has questions about vaccines and
wants to be factually educated to
make informed decisions."*

—Gabriel Cousens, MD, MD(H), DD

Primum non nocere is Latin for "First, do no harm," one of the guiding principles of medical care. Yet there is a large body of scientific evidence confirming numerous vaccine safety deficits that counteract well-publicized benefits. For example, several studies in this book show that mercury and aluminum in vaccines can cause neurological, immunological and developmental harm. Other studies show that childhood vaccines are associated with an increased risk of cancer, allergies, seizures, bleeding disorders, and type 1 diabetes.

The peer-reviewed scientific studies in this book also show that...

- A history of measles and mumps is protective against fatal heart attacks and strokes.
- The pertussis vaccine caused virulent vaccine-resistant strains of pertussis to emerge.
- Chickenpox vaccines reduced cases of chickenpox but increased cases of shingles.
- Children have an increased risk of requiring emergency care after receiving MMR.
- Vaccinated people can spread disease, making "herd immunity" an unrealistic goal.
- Many doctors and nurses are unvaccinated due to concerns about adverse reactions.
- Parents who reject vaccines for their children are highly educated.

"If you trust vaccines to protect you without harm, then you need to read this book."

—Robert Jay Rowen, MD

"Neil Miller's book is a tour de force and a clarion voice championing the cautionary principle: 'When in doubt, minimize risk.' Let's talk science. Read this book. The truth will keep you and your children protected."

—Bradford S. Weeks, MD

"This book should be required reading for every doctor, medical student and parent. Reading this book will allow you to make better choices when considering vaccination."

—David Brownstein, MD

Many people sincerely believe that all vaccines are safe, adverse reactions are rare, and no peer-reviewed scientific studies exist showing that vaccines can cause harm. This book — *Miller's Review of Critical Vaccine Studies* — provides the other side of the story that is not commonly told. It contains summaries of 400 important scientific papers to help parents and researchers enhance their understanding of vaccinations.

They also contain preservatives like 2-phenoxyethanol and stabilizers like sugars (lactose, sucrose), amino acids (glycine), **gelatin**, or proteins (recombinant human albumin, derived from yeast).

Vaccine safety requires proper animal trials and peer-reviewed data, neither of which has occurred during operation warp speed. This is especially concerning considering the fatal failure of prior coronavirus vaccine attempts such as SARS-CoV-1, the virus that is 78% identical to SARS-CoV-2 (COVID-19). Prior coronavirus (and other respiratory) vaccines have failed due to the scientific phenomena known as pathogenic priming that makes the vaccine recipient more likely to suffer a sudden fatal outcome due to massive cytokine storm when exposed to the wild virus. In addition to pathogenic priming there are three other potential safety issues that are being minimized. While we are hopeful that the vaccine is both effective and safe, hope is not science. Because these experimental vaccines have not tested in accordance with the usual standards, we have serious concerns about safety.

By definition it is unsafe to widely distribute an experimental vaccine, because taking a vaccine is completely different than taking an ordinary medication. In contrast to taking a medication for an actual disease, the person who takes a vaccine is typically completely healthy and would continue to be healthy without the vaccine. As the first rule of the Hippocratic Oath is: do no harm --- This is among the cornerstone Islamic law principles, as the Prophet (saw) himself also said, "Do not harm, nor cause harm". , vaccine safety must be guaranteed . Giving a vaccine to a completely healthy young person, is not risk free as will show. That has not yet happened. More studies of the vaccine's safety and efficacy should have been conducted and published, and more transparency about possible risks provided to the public before human are made to enter the largest experimental medication program in our history.

Please see this page for some of the truths about the number of people dying from this experimental vaccine everyday
